News for Immediate Release

Del Norte Outdoors Introduces the Pro Combo Pack The All in One Kit for Sportsmen and Sportswomen

The innovators at Del Norte Outdoors have introduced the Pro Combo Pack, an “all in one” kit for carrying, using and caring for your binoculars, rangefinders, and cameras. At the heart of the Pro Combo Pack is Del Norte’s innovative Optic Belt™, which holds your optics securely while hiking, ATV riding, horseback riding, and performing other extreme movements. The included the Optic Strap, a contoured for comfort lightweight neck strap. It also includes the Spudz Lens Cloth, the micro-fiber lens cleaning cloth for proper maintenance of multi-coated lenses. This combination of outstanding optical products from Del Norte provides the ultimate in security and lens care for your valuable optical equipment.

The Optic Belt eliminates the “binocular bounce” that is associated with the use of optical regular neck straps or slide and flex systems. The Optic Belt also eliminates neck strain by transferring the load from the neck to the chest, so the strain on the neck is eliminated. The unique fold over flap provides protection from rain, dust, sweat, and other debris that collects on your expensive optical equipment. The Optic Strap is a high quality, non-slip, weight reducing neck strap. When used with the Optic Belt, it assists the sportsman to comfortably carry binoculars, cameras and rangefinders in the field.

The Pro Combo Pack is available in Real Tree HD Green® (Cat. # PCP105). One size adjusts to fit all sportsmen and sportswomen.
